

We celebrated Mid-Summer in Neolithic style...

..at an outdoor museum with a collection of ancient (style) buildings....

...and workshops. Here a pottery kiln...

..and lots of  
craftsmen  
making all the  
necessities of  
life.

Refining copper, a little at a time...

...and working iron.

But the main attraction: a Burning Man!

After some dramatic warmup...

...they light the man...

..and the dancers spin faster...

..and we are assured of a bountiful year!
